

ULTRA LOW LEVEL MERCURY IN WATER BY 1631

Inter-Mountain Labs (IML) provides ultra low level mercury analysis at the sub parts per trillion level (0.5 ppt) to help meet government agency requirements in determining fisheries impacts, baseline assessments and ground and surface water modeling. Inter-Mountain Labs provides the field sampling kits to help insure quality control and the expertise to assist in the collection and reporting of ultra low level mercury analysis.

Field Sampling Kits

- ✓ IML provides Trip Blanks
- ✓ Pre-Cleaned Sample Containers
- ✓ Double Bagged with Gloves
- ✓ Ready for "Clean Hands/Dirty Hands" Sampling

Analytical Expertise

- ✓ "Clean Room" Environment
- ✓ Ultra-Purified Chemical Reagents
- ✓ 28 Years of Experience in Environmental Testing
- ✓ Project Managers Assigned to Every Client

Flexible Reporting

- ✓ Lab Reports Available in Excel, pdf, and Database Formats
- ✓ Customized Reporting Available
